

Metsä Tissue Mariestads mill - The Future mill

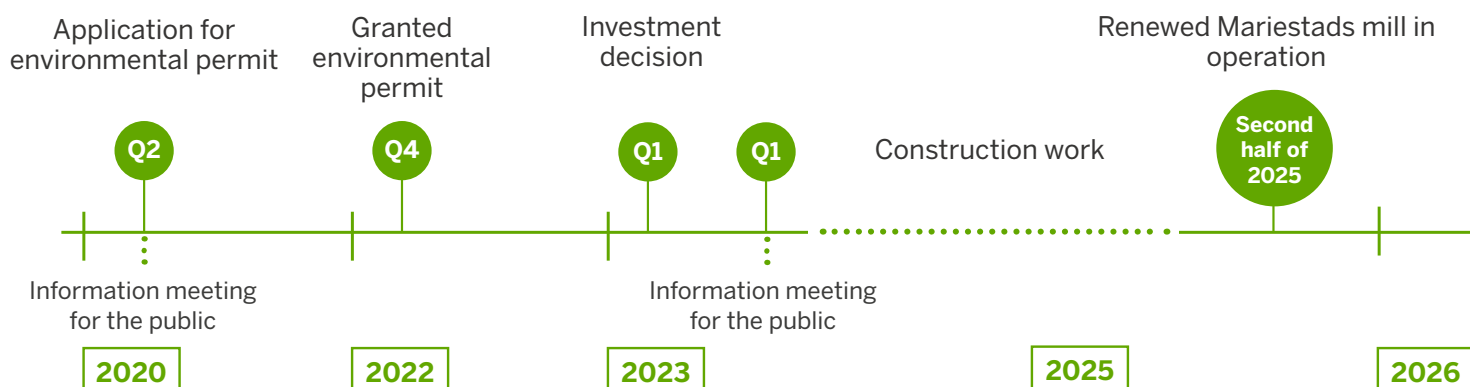

Metsä Tissue, part of the Metsä Group, is investing in to a fossil free future at its Mariestad mill in Sweden. The investment will increase the availability of locally and sustainably produced tissue products in the Scandinavian market, in which approximately 40 percent of tissue usage is currently imported. With this Metsä Tissue will be a forerunning company in investing into sustainable tissue production in Sweden and Scandinavia with its strong brands Lambi, Serla and Katrin.

The investment is one of the largest in the tissue business in Europe and the largest within Metsä Tissue. The construction works will start during spring 2023 and the renewed mill is planned to be operational in the second half of 2025.

Key figures

ANNUAL PRODUCTION INCREASE	YEAR THE RENEWED MILL IS PLANNED TO BE IN OPERATION	TOTAL EMISSIONS OF CARBON DIOXIDE 2030
